ValueBox System.
Important things require secure systems.

The System series is a flexible and smart solution that offers even more control over your valuables. The keypad comes with a display to provide a good overview and easy programming. The cabinets can handle up to 500 users (codes with 1-8 characters) and store up to 3,600 events. Just like our more advanced key management systems, you can administer System using our smart KeyWin Light software. The cabinets are available in various models with 2 to 6 compartments.

All cabinets can be expanded using the expansion series, Expansion, by up to 15 cabinets in any combination. In other words, you can have up to 96 compartments in the same system controlled via the main cabinet's keypad.

KeyWin Light

The KeyWin Light PC program gives a better overview of the System series. You can check and control the system by plugging a USB flash drive with a service code into the cabinet. The event log is also downloaded to the USB flash drive, which you can then process on a computer.
